

AKINGBOYE AYOMIDE

Junior Data Analyst

akingboyeayomide29@gmail.com | 08128129139 | linkedin.com/in/AkingboyeAyomide | github.com/Neta-cad

PROFESSIONAL SUMMARY

Detail-oriented and motivated Junior Data Analyst with hands-on experience in SQL/PostgreSQL, Python, Power BI, and Excel. Adept at transforming raw data into actionable insights that drive business decisions. Certified in Data Analytics and demonstrated through real-world projects including a revenue intelligence system and a digital marketplace platform serving the Nigerian and African markets. Strong communicator with a passion for data storytelling and building scalable data solutions.

TECHNICAL SKILLS

Data Analysis & Querying: SQL, PostgreSQL, Supabase — schema design, indexing, audit triggers, row-level security

Visualisation & Reporting: Power BI, Tableau, Excel (PivotTables, VLOOKUP, charts), Google Sheets

Programming: Python (data manipulation, automation)

Database Design: Entity-relationship modelling, normalisation, seed data management, foreign key integrity

Cloud & DevOps Foundations: Cloud computing concepts; AWS fundamentals (in progress)

Soft Skills: Data storytelling, critical thinking, problem decomposition, collaborative team work

PROJECTS

Revenue Intelligence System | Remote Hustle Competition – Stage 2

Tech Stack: PostgreSQL · Supabase · SQL · Database Design

- Architected a 12-table relational schema on Supabase/PostgreSQL covering revenue streams, clients, products, transactions, and performance metrics.
- Implemented composite indexes and audit triggers to ensure data integrity, traceability, and query performance optimisation.
- Inserted and validated comprehensive seed data across all 12 tables, ensuring referential integrity and realistic data distributions for analytics testing.
- Applied row-level security (RLS) policies to enforce data access control at the database level.
- Structured the system to support multi-dimensional revenue analysis, enabling drill-down reporting by product, region, and time period.

SkillConnect Africa | Personal Project – Founder & Data Lead

Tech Stack: PostgreSQL · SQL · Excel · Market Research · Data Storytelling

- Conceptualised and developed a verified digital marketplace connecting skilled tradespeople (artisans, technicians, craftspeople) with clients across Nigeria and broader African markets.
- Designed a relational data model to track verified service providers, client requests, transaction history, and performance ratings.
- Conducted market research across Nigerian informal and formal labour sectors, identifying key friction points in skilled-trade matching and translating findings into data-driven product decisions.
- Built Excel-based dashboards to analyse market opportunity, user segment sizing, and projected revenue, using data storytelling to communicate insights to stakeholders.
- Applied data validation and verification logic to ensure integrity of provider credentials and service listings.

RemoteHustleDB – Master Operational Database | Remote Hustle Competition – Stage 1

Tech Stack: PostgreSQL · Supabase · SQL · GitHub

- Designed and implemented a 10-table operational database on Supabase/PostgreSQL covering users, roles, projects, tasks, payments, and activity logs.
- Wrote advanced SQL queries for data retrieval, joins, aggregations, and business reporting across multiple tables.
- Configured row-level security policies and managed GitHub version control for the full project pipeline.
- Delivered a complete project including schema design, seed data, RLS, GitHub repository, and a demo video script.

CERTIFICATIONS

Data Analytics Certificate — Quantum Analytics

EDUCATION

National Open University of Nigeria (NOUN)

Undergraduate Student | Currently enrolled, 100 Level

ADDITIONAL

- Currently deepening expertise in cloud computing (AWS) and DevOps practices.
- Active participant in competitive data and tech challenges (Remote Hustle Competition).
- Strong interest in African tech ecosystems, digital financial inclusion, and data-driven entrepreneurship.
